## Subject: Application for Frontend Developer Internship

**Assalamu Alaikum,**

I'm writing to express my interest in the **Frontend Developer Internship** position at **Express IT BD**. As a student learning web development step by step, I've been working with **React.js** and recently started exploring **Next.js** to build dynamic and user-friendly web applications.

So far, I've gained practical experience with **React.js**, **Node.js**, **Express.js**, and **MongoDB** through different projects. I'm also confident working with **REST APIs**, **React Hooks**, and managing state using **Context API**. I enjoy turning designs into responsive websites, solving coding problems, and writing clean, reusable code.

Joining a growing tech team like Express IT BD feels like the right step for me. I believe that real-world experience, mentorship, and working with skilled developers will help me grow faster. I'm very eager to learn, contribute, and become a valuable part of your team.

I've attached my CV for your kind consideration. I would be grateful for the opportunity to discuss how I can support your team if selected for an interview.

Thank you so much for your time and consideration.

**Sincerely,**
Nahid Hasan
